

*FORTICRETE GEMINI –
TRADITIONAL PLAIN TILE APPEAL
AT A MUCH LOWER COST AND
LOWER PITCH FLEXIBILITY TO
22.5°.
A DESIGN AND INNOVATION
AWARD WINNER*

*FORTICRETE'S
INVESTMENT IN CSR
HAS DRIVEN ALL ITS SITES TO
ACQUIRE THE
INTERNATIONAL ENVIRONMENT
STANDARD
BS EN ISO 14001:2004*

WHEN YOU WEIGH IT UP

You won't want to use concrete plain tiles ever again

**40% LESS CO₂ emissions
for every m² of roof
– at LESS COST**

When we weighed up the amount of CO₂ produced in manufacturing the constituents of our concrete plain tiles and then compared this with our latest Gemini tile, factored in the difference in weight (75kg/m² v 45kg/m²) and quantity of tiles on the roof (60/m² v 16.3/m²), our direction was clear. That's why, as part of our commitment to the built environment, we're moving away from plain tiles in favour of Gemini and so should you - it only makes ecological and economic sense.

*30% REDUCTION
IN TRAFFIC MOVEMENT AND
30% LESS RAW MATERIAL IN
MANUFACTURE.
GEMINI IS A FORTICRETE ECOTILE*
